Please find below and/or attached an Office communication concerning this application or proceeding.

FIRST NAMED INVENTOR

Nick J. Grivas

The time period for reply, if any, is set in the attached communication.

12/12/2007

	Application No.	Applicant(s)
Office Action Summary	10/737,234	GRIVAS ET AL.
	Examiner	Art Unit
	Dai A. Phuong	2617
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).		
Status		
<ol> <li>Responsive to communication(s) filed on <u>05 October 2007</u>.</li> <li>This action is <b>FINAL</b>. 2b)  This action is non-final.</li> <li>Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i>, 1935 C.D. 11, 453 O.G. 213.</li> </ol>		
Disposition of Claims		
<ul> <li>4)  Claim(s) 1-10,13-22,25-36 and 39 is/are pending in the application.</li> <li>4a) Of the above claim(s) is/are withdrawn from consideration.</li> <li>5)  Claim(s) is/are allowed.</li> <li>6)  Claim(s) is/are rejected.</li> <li>7)  Claim(s) is/are objected to.</li> <li>8)  Claim(s) 1-10, 13-22, 25-36 and 39 are subject to restriction and/or election requirement.</li> </ul>		
Application Papers		
9) The specification is objected to by the Examiner.		
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.		
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).		
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.		
Priority under 35 U.S.C. § 119

## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-10, 13-14, 26-35 and 39 drawn to method, comprising: I. providing a docking apparatus coupled to interface with a vehicle; communicatively coupling a remote communications device to the docking wherein communications apparatus, the remote device does not include a telematics functionality module; and the docking apparatus communicating with the remote communications device to include the telematics functionality module in a memory of the remote communications device, classified in class 455, subclass 212.
  - II. Claims 15-22 and 25, drawn to method, comprising: providing a docking apparatus coupled to interface with a vehicle; communicatively coupling a non-telematics enabled remote communications device to the docking apparatus; and the docking apparatus and the non-telematics enabled remote communications device operating to transform the non-telematics enabled remote communications device into a telematics enabled remote communications device, including: the docking apparatus querying the non-telematics enabled remote communications device for the presence of the telematics functionality module in the non-telematics enabled remote communications device, wherein if the non-telematics enabled remote communications device includes the telematics functionality module, the docking apparatus enabling the telematics functionality module in

Art Unit: 2617

the non-telematics enabled remote communications device, thereby transforming the non-telematics enabled remote communications device into the telematics enabled remote communications device, and wherein if the non-telematics enabled remote communications device does not include the telematics functionality module, the docking apparatus communicating with the non-telematics enabled remote communications device to include the telematics functionality module in a memory of the non-telematics enabled remote communications device, thereby transforming the non-telematics enabled remote communications device into the telematics enabled remote communications device, classified in class 455, subclass 575.9.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, subcombination I has separate utility such as requiring communicatively coupling a remote communications device to the docking apparatus, wherein the remote communications device does not include a telematics functionality module; and the docking apparatus communicating with the remote communications device to include the telematics functionality module in a memory of the remote communications device.

In the instant case, subcombination II has separate utility such as requiring communicatively coupling a non-telematics enabled remote communications device to the docking apparatus; and the docking apparatus and the non-telematics enabled remote communications device operating to transform the non-telematics enabled remote

Art Unit: 2617

<u>communications device into a telematics enabled remote communications device</u>. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

- 2. A telephone call was made to the Applicant's attorney on 11/30/2007 to request an oral election to the above restriction requirement, but the examiner was unable to reach the attorney
- 3. Application is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)
- 4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dai A Phuong whose telephone number is 571-272-7896. The examiner can normally be reached on Monday to Friday, 9:00 A.M. to 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nguyen Duc can be reached on 571-272-7503. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
